

David Tellis

Product Designer · UI/UX Designer · Design Systems

Based in India · Open to Bengaluru Relocation · On-Site | davidtellis12@gmail.com | +91 8088716380 | davidtellis.online | linkedin.com/in/david-tellis-121576262

SUMMARY

Product Designer with **3 years of experience** shipping **SaaS platforms and complex web applications** with measurable outcomes — designing information-dense dashboards, admin tools, conversion-critical onboarding and checkout flows, and AI-assisted search and recommendation features. Fluent in Figma (Auto Layout, Variables, component libraries, Dev Mode), comfortable creating developer-ready files with responsive states, empty states, loading states, and edge cases. Product-thinker first: comfortable with ambiguity, direct founder feedback, and fast iteration in a small team.

EXPERIENCE

Product Designer — Turbostart (VC Portfolio Studio)

Sole Product Designer across 4 portfolio companies · Remote · Mar 2024 – May 2026

- Owned **end-to-end product design** across 4 concurrent portfolio companies — from written product specifications to wireframes, user flows, screen-by-screen designs, and shipping with engineering to production.
- Drove a 35% adoption lift and 40% navigation reduction on TurboCloud**, a shipped B2B FinOps SaaS platform, by turning dense multi-cloud cost, deployment, and analytics data into **role-based dashboards for 5 personas** — an information-dense analytics product with real-time tracking, admin controls, and search/filter-heavy views.
- Cut vendor onboarding from 3 hours to 15 minutes (92% reduction)** and lifted retention **+28%**, discovery **+63%**, and response rates **+42%** on Wedding Verse — a shipped consumer marketplace — by designing a voice-based **AI-assisted conversational onboarding funnel** and **NLP-driven search and recommendation system** that activated cold visitors into paying users.
- Designed a **4-surface B2B ecosystem (VYBE)** including an AI Document Vault with live risk scoring and **role-based access controls** across investor, mobile execution, service-provider, and admin surfaces — compressing multi-week manual due diligence into a **10-minute automated flow across 15M+ data points**.
- Built and maintained a **120-component design system** across 8 pattern libraries and 2,000 Figma frames using Auto Layout, Variables, and component-based patterns — creating developer-ready files with responsive states, empty states, loading states, and edge cases documented — cutting design-to-dev revision cycles by **30%**.
- Used **AI as a core part of the design workflow** (Claude, Figma Make, Google AI Studio) for prototyping and design-to-code handoff, and mentored 2–3 junior designers through structured design reviews.

Freelance Product & UI Designer

International consumer & SaaS clients · Remote · 2024 – Present

- Designed the full product experience for **Vorn AI**, a Dubai-based consumer fashion e-commerce platform — mobile-first responsive interfaces with a **conversion-critical checkout funnel** spanning browsing, Virtual Try-On, styling, and payment, with attention to interaction states, empty states, and edge cases.
- Redesigned **MedPass**, a healthcare mobile application, streamlining the **patient payment redemption flow** — a conversion-adjacent flow — through refined IA and interaction design; delivered clean mobile UX with consistently positive post-launch user feedback.
- Generated 300+ waitlist signups within 2 weeks of launch** on FutureCraft AI by designing a Brand DNA progressive-profiling activation flow. Also delivered **100+ component libraries** with Auto Layout, tokens, and dev-ready handoff across multiple client products.

Website Designer & Developer — Glee and Glint Media

Managed a 6-person team · Mar 2023 – Feb 2024

- Designed and shipped **custom client websites** end-to-end — wireframes and visual design through front-end implementation in HTML, CSS, and JavaScript — while managing a 6-person team of designers and developers.

SKILLS

CONVERSION & GROWTH	Conversion Funnels, Checkout & Payment Flows, Signup & Onboarding, Activation, Retention, Feature Usage, Growth Design, Product Analytics	COMPLEX UX	Information-Dense Interfaces, Analytics Dashboards, Admin Tools, Search & Filter UX, Data-Heavy Views, Multi-Persona IA, Role-Based Access
AI PRODUCT	AI-Assisted Workflows, Conversational UI, AI Search & Recommendation, NLP Filters, AI Onboarding, Chat-Style Interfaces, AI Design Language System	SYSTEMS	Design Systems, Component Libraries, Auto Layout, Variables, Design Tokens, Reusable Patterns, Dev Mode, Developer Handoff
CRAFT	Typography, Colour, Layout, Visual Hierarchy, Responsive Design, Micro-interactions, WCAG / Accessibility, Empty & Loading States	RESEARCH	User Interviews, Usability Testing, Personas, Journey Maps, User Flows, Iterative Design, Founder-Adjacent Delivery
FRONTEND	HTML, CSS, JavaScript, React, TypeScript, API-Aware Design, Design-to-Code Handoff	TOOLS	Figma, FigJam, Figma Make, Adobe XD, Photoshop, Illustrator, Claude, Google AI Studio, Rive, Lottie

EDUCATION

MCA, Mysore Open University · In Progress | BCA, Davangere University · 2022
