

Product Designer with **3 years of experience** delivering MVPs across AI platforms, FinOps, dual-sided marketplaces, and e-commerce. Specialising in **AI-native interfaces**, **analytical dashboards**, and **scalable design systems** with a strong foundation in front-end development. Proven track record of driving measurable adoption, compressing timelines, and shipping accessible, production-ready experiences across B2B and B2C platforms at scale.

SKILLS & TOOLS

PRODUCT & AI UX

- Figma AI-native Design
- Dashboard Design
- Design Tokens Prototyping
- Wireframing
- Typography Systems
- Colour Systems
- Responsive Layouts
- WCAG / Accessibility
- Visual Brand Strategy
- Asset Optimisation
- Figma Make
- Figma Variables
- Design Systems Management
- Component Library
- Interaction Design

RESEARCH & PROCESS

- User Research
- Usability Testing
- Journey Mapping
- Information Architecture
- A/B Testing
- Progressive Disclosure
- Agile / Sprints
- Behavioural UX
- Service Design

AI SURFACES

- Conversational UX
- AI Onboarding Flows
- NLP Search Design
- Fallback Logic
- Streaming Outputs
- Loading States
- Uncertainty States
- Agentic UI
- Google AI Studio Lottie

TOOLS

- Figma HTML / CSS
- FigJam Rive Spline
- VS Code Notion
- Adobe XD Lottie

EDUCATION

Master of Computer Applications
Mysore Open University
Present

Bachelor of Computer Applications
Davangere University
Oct 2022

LANGUAGES

- English Hindi Kannada

EXPERIENCE

Product Designer · Turbostart (Venture Capital)

Mar 2024 - May 2026

Sole Product Designer — owning end-to-end design from research to production-ready handoff across all products simultaneously.

- / Drove **product strategy and UX direction** across 4 concurrent portfolio companies spanning FinOps, PropTech, entertainment, and wedding tech, proactively embedding into early discovery phases to shape feature prioritisation and MVP scope before design began.
- / Conceptualised and designed **Ideabaaz**, an idea validation and community platform, owning full information architecture, user flow design, journey mapping, and interaction systems from research to handoff, contributing to product strategy alongside the founding team across a fast-moving MVP timeline.
- / Mentored 2 to 3 junior designers through **structured critique and component-first workflows**, built and maintained Figma design systems with reusable component libraries and annotated dev specs across all portfolio products, cutting design-to-dev revision rounds by 30%, and collaborated daily with engineers, PMs, and stakeholders to bridge design intent and technical constraints.

Wedding Verse · AI-Powered Wedding Planning Marketplace

Dual-Sided · AI Onboarding

- / Architected **emotionally guided consumer discovery journeys** using NLP-powered search, contextual vendor recommendations, and progressive filtering, reducing cognitive overload while improving discovery speed by 63% and vendor response rates by 42%.
- / Designed **AI voice onboarding flows with fallback logic**, replacing dense setup forms with a conversational AI-led experience that compressed vendor onboarding from 3 hours to 15 minutes.
- / Built a **120-component design system** across 8 pattern libraries spanning 2,000 Figma frames, covering onboarding, dashboards, and lead management with engineering-ready documentation.

IMPACT 3 hrs to 15 min onboarding Discovery +63% Response rate +42% Retention +28% 120 components · 2,000 frames

TurboCloud · FinOps and Cloud Infrastructure Platform

Enterprise SaaS · Multi-cloud · DevOps

- / Designed and shipped **role-based enterprise dashboards** for TurboCloud serving 5 distinct personas (developers, DevOps, FinOps teams, admins, and CIO-level stakeholders), structuring information hierarchy so each role surfaces operationally relevant data without cognitive overload.
- / Reduced navigation complexity by 40% and drove a 35% feature adoption lift through **recommendation-driven FinOps visualisations** and a stepper-based CI/CD deployment flow compressing 7 fragmented steps into 3 clear checkpoints.

IMPACT 35% adoption lift 40% nav reduction AWS · Azure · GCP · Kubernetes

VYBE · Pre-Development Real Estate Intelligence Platform

Fintech · PropTech · Pre-launch

- / Built an **AI Document Vault UI** with live health-checking and instant risk scoring for critical property files (Sale Deeds, RTC extracts, Encumbrance Certificates), transforming weeks of manual legal due diligence into a 10-minute automated verification flow.
- / Architected a **4-surface multi-persona ecosystem from 0 to 1** — a premium HNI investor web app, an mWeb interface for on-the-go execution, and specialised portals for service providers and system administrators.

IMPACT Feasibility months to days Legal due diligence to 10 min 15M+ data points automated Pre-launch MVP

BAM · Talent and Event Marketplace Ecosystem

Dual-Sided · Entertainment · 12 Verticals

- / Architected a **multi-dimensional IA and taxonomy system** classifying 100+ specialised sub-categories across 12 entertainment verticals, with context-aware filtering and NLP-driven search to simplify deep-hierarchy discovery for both talent and event planner personas.
- / Engineered **intent-based landing pages and PLPs** that dynamically adapt layouts and filtering mechanisms based on use-case contexts such as corporate events, film production, and live performances, reducing irrelevant content exposure and accelerating path-to-intent.

IMPACT 100+ sub-categories · 12 verticals NLP search · Conditional logic Shipped

Full-Stack Designer · Freelance

Since 2024

Independent contracts for clients internationally, handling multi-disciplinary design roles spanning UI/UX, interaction design, motion, landing pages, and brand identity.

- / Designed **FutureCraft AI**, an AI-powered content SaaS platform, from brief to investor prototype, architecting a Brand DNA onboarding system using progressive profiling that replaced generic AI outputs with brand-personalised content generation and reduced estimated content turnaround time by 70%, generating 300+ waitlist signups within 2 weeks of launch.
- / Architected the full product experience for **Vorn AI**, a Dubai-based fashion e-commerce platform. Engineered the interface and underlying interaction logic for a spatial computing and Virtual Try-On platform, resolving heavy interaction-state management and 3D data constraints to drive conversion from virtual styling into online-to-offline checkout funnels.
- / Redesigned **MedPass**, a healthcare mobile application, streamlining the patient discount redemption flow through simplified IA and friction-reduced interaction design, delivering a cleaner and more intuitive experience with consistently positive user feedback post-launch.
- / Delivered **100+ component libraries** with light and dark mode theming and design tokens across multiple client products, aligning all design decisions with API constraints and backend data schemas to produce implementation-ready handoff documentation for engineering teams.
- / Led **brand identity design** for artists, bands, and independent clients, conceptualising logos, visual identity systems, and presentation documents that positioned clients for high-stakes commercial and festival engagements.

Website Designer / Developer · Glee and Glint Media

Mar 2023 - Feb 2024

- / Designed and developed **custom websites and high-fidelity client presentation assets** for multiple clients, owning visual design, layout systems, typography, asset optimisation, and front-end implementation from brief to launch.
- / Produced **conversion-focused landing pages** aligned to client brand guidelines, balancing visual hierarchy, colour systems, and call-to-action placement to drive engagement across digital campaigns.
- / Managed a **6-person cross-functional team** across design, development, and client communication, coordinating deliverables and ensuring on-time project delivery across all active accounts.
